Amendments to the Claims:

ì

The following claims will replace all prior versions of the claims in this application (in the unlikely event that no claims follow herein, the previously pending claims will remain):

- 1. (Currently amended) Process process for producing by blow-moulding a multilayer film containing at least a polyamide layer and a polyolefin layer, characterized in that a branched polyamide is used as polyamide.
- 2. (Currently amended) Process according to claim 1, wherein the polyolefin layer consists essentially of consists of LLDPE.
- 3. (Original) Process according to claim 2 wherein the LLDPE contains at most 5% of another polyethylene.
- 4. (Original) Process according to claim 1 wherein the polyolefin layer consists essentially of polypropylene.
- 5. (Currently amended) Multilayer film containing at least a polyamide layer and a polyolefin layer directly connected thereto or connected thereto by an adhesive layer, characterized in that wherein the polyamide is a branched polyamide.
- 6. (Original) Multilayer film according to claim 5 wherein one or more polyolefin layers are polyethylene layers, which polyethylene layers, other than adhesive layers, if present, contain only polyethylene which is at least 95% linear low-density polyethylene.
- 7. (Original) Multilayer film according to claim 5, wherein the polyolefin layer consists essentially of polypropylene.
